

DOUBLE ROPE KIT QUICK START GUIDE (70-90).

FOR USE WITH 70-2 & 70-9 KITS

This guide is supplied as a reference and is not a replacement for fully reading and understanding all applicable users manuals

1

1.1) Included with the double rope kit is a pulley assembly and a Jaw/Eye swivel. Verify that you have received both items.

2

2.1) Unbolt the pulley keeping track of all components so they may be re-assembled in the same position as they were dis-assembled (eg. Bolt, nut, pulley, bearing(s), spacer(s), and washer(s)).

3

Connect the Jaw/Eye swivel to the double rope tab on the hoist. Then connect the wire rope to the Jaw/Eye swivel with the original shackle. Be sure to bend over the cotter pin on the Jaw/Eye swivel and make sure all pins are tight

4

4.1) Position the pulley at the bottom of the wire rope loop (in the groove).

4.2) Install the pulley housing from the bottom. Making sure all components are put back in the same order. Tighten all bolt and nut assemblies. The pulley and the hook should move freely.
